I. About Doing Business

- I. Findings of Doing Business 2020
- **III.** Good practices of reformers

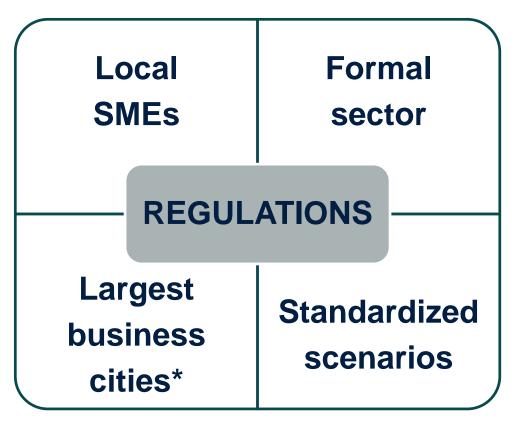

THE AREAS OF BUSINESS REGULATION MEASURED BY DOING BUSINESS

Doing Business analyzes regulation that encourages efficiency and supports freedom to do business:

What is the Focus of the Doing Business Indicators?

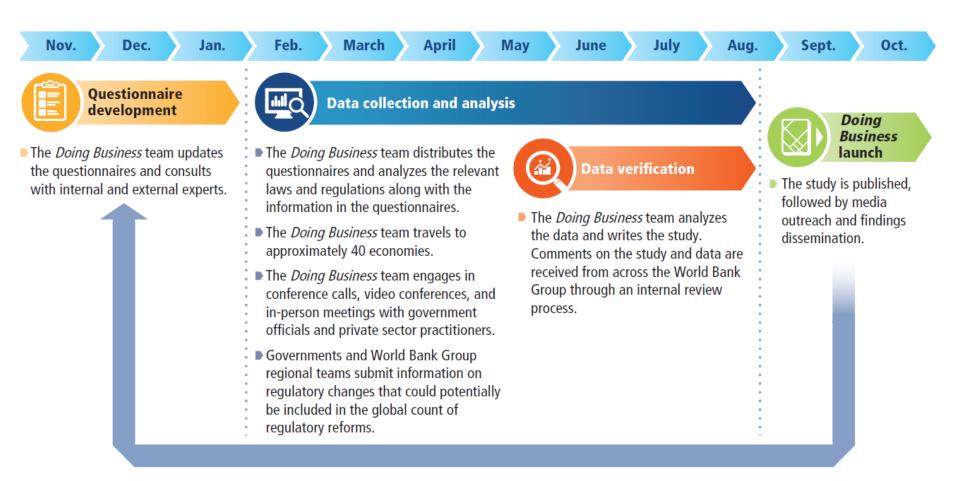

Note: The second largest business city is also measured in economies with more than 100 million inhabitants as of 2013

"Governments can foster market-oriented development and growth by creating rules that help businesses create, hire and expand. Removing barriers to entrepreneurs generates better jobs, more tax revenues and higher incomes."

World Bank Group President David Malpass

How **Doing Business** Collects and Verifies the Data?

BUSINESS FRIENDLY REGULATIONS AS MEASURED BY DOING BUSINESS ARE ASSOCIATED WITH GROWTH

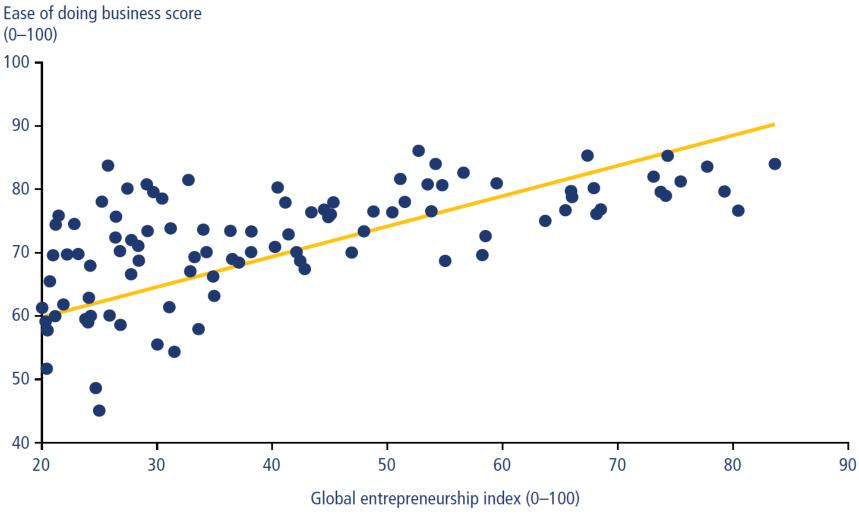

An improvement of 10 points in the overall ease of doing business score is linked to an increase of around 0.5 new businesses per 1,000 adults

Source: Djankov, Georgieva, Ramalho (2018); Divanbeigi, Ramalho (2015).

Greater Ease of Doing Business is Associated with Higher Levels of Entrepreneurship

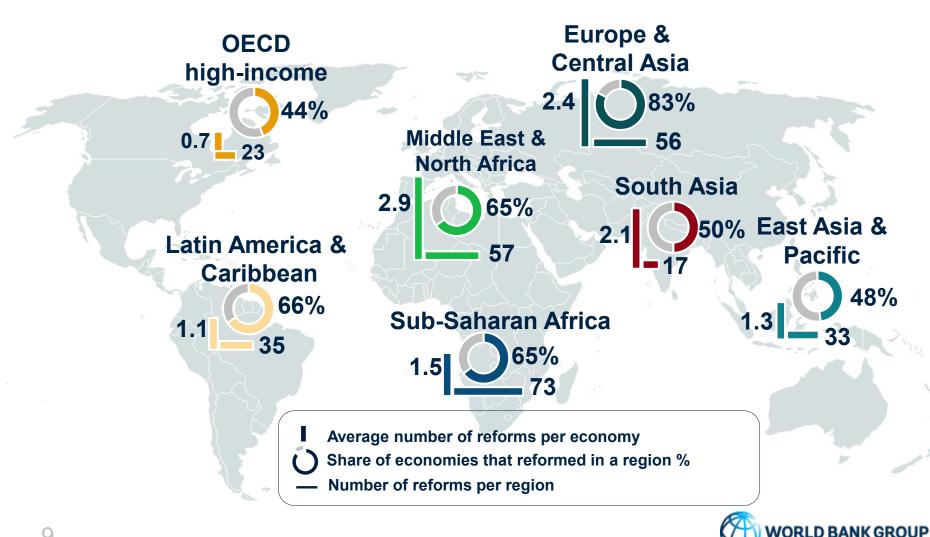

I. About Doing Business

II. Findings of Doing Business 2020

III. Good practices of reformers

Developing economies implemented 72% of all regulatory reforms in 2018/19

In EAP: China and the ASEAN bloc are leading the reform efforts. Pacific Island countries are lagging

25 20 High income Upper middle income 15 Lower middle income 10 5 Solomon Islands Papua New Guinea Brench Darussalam Taiwan, China Philippines Indonesia Mongolia Malaysia ADD PDR Th_{ailand} Wyannar Cambodia Vietnam Vanuatu SAR, China Palau Timor Lest Singapon Viarshall Islag Micronesia, Hong Kc

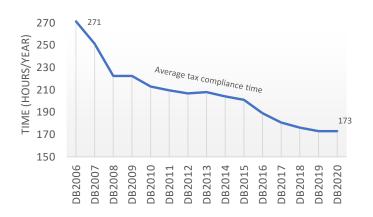

EAP - Change in EODB score from DB10 to DB20

- Improvements are driven by countries of mixed income levels
- Top reformers:: China DB19, DB20; Brunei DB18, DB17, DB11; Thailand DB18; Indonesia DB17; Mongolia DB13; Solomon Islands in DB12.
- Small island states generally not reforming

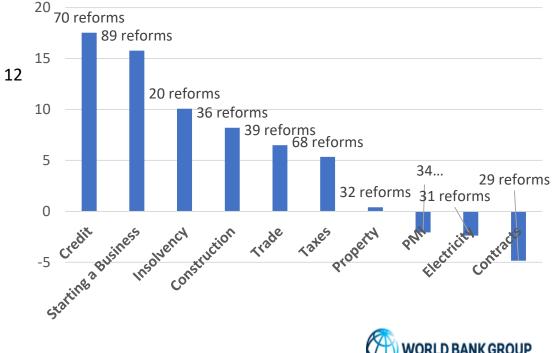

Reform effort in EAP focused on starting a business, insolvency and construction permits

- Most improved topics: Getting Credit, Starting a Business, Insolvency
- DBRA support mostly in topics: Starting a Business, Registering Property
- Insolvency: New insolvency legislations: Vietnam, Indonesia, Philippines, Brunei; Solomon Islands, Vanuatu, Cambodia (first insolvency law); Thailand and China strengthened existing insolvency frameworks.
- Paying Taxes: Compliance time fell from 272 hours/year to 173 hours/year in EAP in the past 12 years.

EAP – Change in EoDB scores for each indicator

Timeline: from year when indicator was introduced (between DB04 and DB10) to DB20

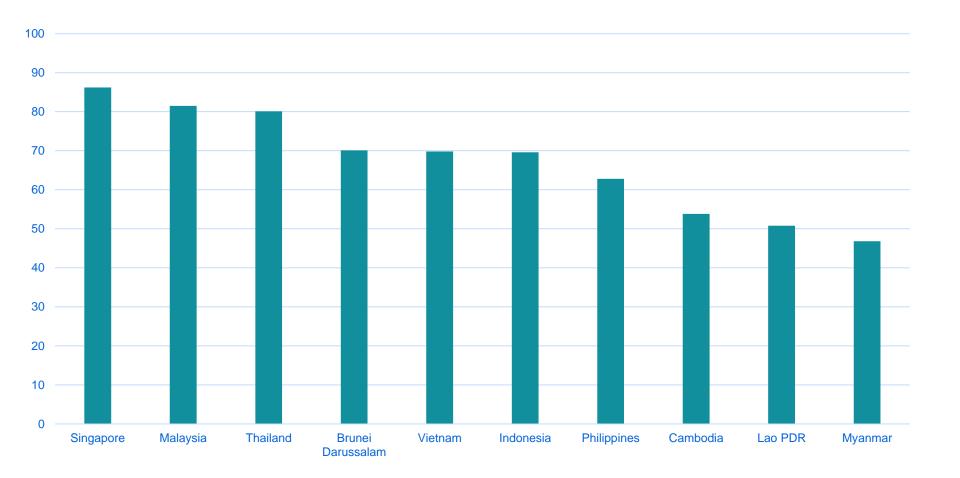

How did economies in East Asia and the Pacific perform on the ease of doing business in 2017/18?

| Rank | Economy | Score | | |
|------|----------------------|-------|--|--|
| 2 | Singapore | 86.2 | | |
| 3 | Hong Kong SAR, China | 85.3 | | |
| 12 | Malaysia | 81.5 | | |
| 15 | Taiwan, China | 80.9 | | |
| 21 | Thailand | 80.1 | | |
| 31 | China | 77.9 | | |
| 66 | Brunei Darussalam | 70.1 | | |
| 70 | Vietnam | 69.8 | | |
| 73 | Indonesia | 69.6 | | |
| 81 | Mongolia | 67.8 | | |
| 95 | Philippines | 62.8 | | |
| 98 | Samoa | 62.1 | | |
| 102 | Fiji | 61.5 | | |

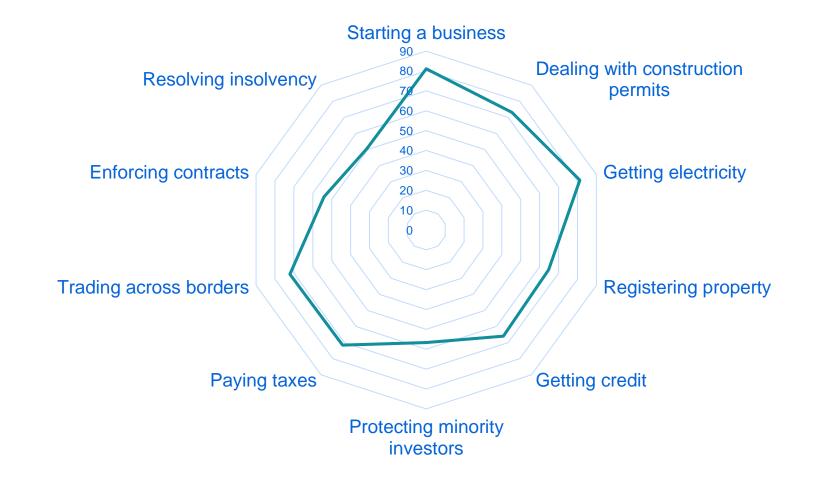

| Rank | Economy | Score | | |
|------|-----------------------|-------|--|--|
| 103 | Tonga | 61.4 | | |
| 107 | Vanuatu | 61.1 | | |
| 120 | Papua New Guinea | 59.8 | | |
| 136 | Solomon Islands | 55.3 | | |
| 144 | Cambodia | 53.8 | | |
| 145 | Palau | 53.7 | | |
| 153 | Marshall Islands | 50.9 | | |
| 154 | Lao PDR | 50.8 | | |
| 158 | Micronesia, Fed. Sts. | 48.1 | | |
| 164 | Kiribati | 46.9 | | |
| 165 | Myanmar | 46.8 | | |
| 158 | Timor-Leste | 49.07 | | |

Doing Business in ASEAN – Ease of Doing Business Score DB20

Doing Business in ASEAN – Average performance across areas

Economies in ASEAN that Reformed Their Business Environment in the past two years

| Starting a business | Indonesia, Philippines (2020), Brunei, Indonesia, Malaysia, Philippines, Singapore, Thailand, Vietnam (2019) | | | | 9 | | |
|-----------------------------------|---|---|---------------------------------------|---|---|-----------|---------------------|
| Dealing with construction permits | Maylasia, Philippines, Singapore, Thailand (2020), Malaysia, Philippines (2019)6 | | | | | | |

SINCE 2004, REFORMS reduced the time OF DOING BUSINESS IN ASEAN

11 reforms between DB17 and DB20

1. Implementation of electronic services: online single window to carry out property searches (e-Tanah system), electronic forms for export/imports, online registration and e-filing and e-payment for GST.

2. Process Improvement:

- Eliminated road and drainage inspection during construction permit application and eliminated site visit during electricity connections.
- Enhanced risk-based inspections at customs and reduced physical inspections.

3. Legal reform:

- Changes to the Companies Act to introduce the option of reorganization in insolvency proceedings and strengthened corporate transparency.
- Administrative instructions and circulars related to the changes in construction permits and electricity connections.

16 reforms between DB17 and DB20

1. Implementation of electronic services: e-registration, e-Payment, electronic Lands Maps systems, e-Receipt, e-Transition (customs clearance system), Court automation (e-filing and e-payment at courts), e-Insolvency Case Management, etc.

2. Process Improvement:

- Introduced flat rate for business registration, eliminated requirement to obtain a company seal and requirement to approve work regulations with Labor Department.
- Reduced the required issuance time for an occupancy permit, especially for smaller low risk buildings, from 30 days to 15 days; Introduced phased inspections.
- Improved electricity installation process by parallel inspecting the internal and external cable works, (reduce 37 days process to 15 days and from 5 steps to 2). Increased transparency of tariffs.
- Reduced time to comply with corporate income tax from 156 hours to 154 hours due to the availability of spreadsheets embedded with formulas and tax rules that allowed taxpayers to compute corporate income tax automatically.

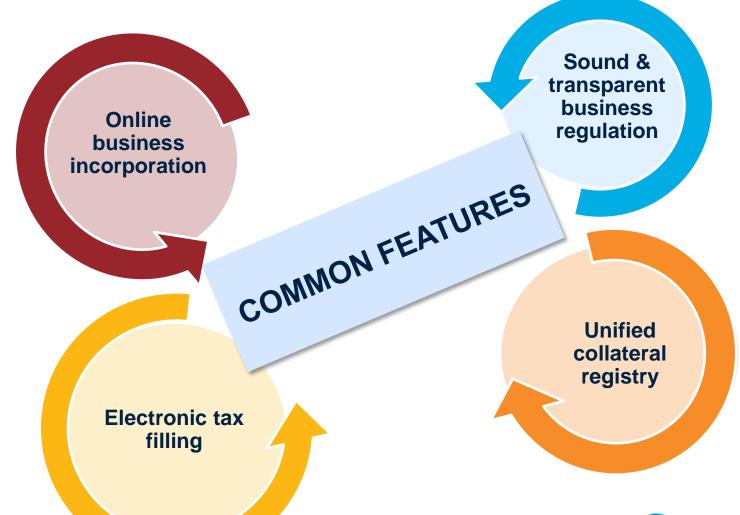

3. Legal reform: Order of the Head of NCPO, No. 21/2560, on 4 April B.E. 2560 (2017) "Amendments of Laws to Facilitate the Ease of Doing Business:"

- **I.** About Doing Business
- **II.** Findings of Doing Business 2020
- **III.** Good practices of reformers

Top performing economies in the ease of doing business share common features of regulatory efficiency and quality

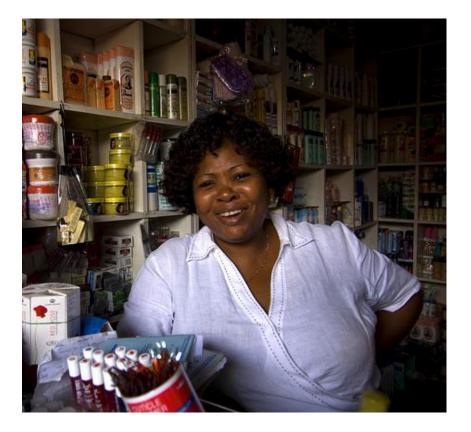

Global Trends In Good Practices – Some Common Features Among Top Economies And Top Reformers

- Strong information base and data-centric systems (starting a business, getting credit, registering property, paying taxes)
- Risk-based approach to regulation and supervision (starting a business, dealing with construction permits, trading across borders, paying taxes)
- Legal frameworks and institutions provide strong property rights protections (secured transactions, resolving insolvency, registering property, enforcing contracts)
- Citizen and business centric vs government centric \rightarrow Integrated service delivery and "one government" policy with effective data-sharing
- Updated regulatory frameworks and institutions to leverage technology (e-transaction, e-document, e-signature laws, etc).

STARTING A BUSINESS GOOD PRACTICES

Global good practices

- ✓ Putting procedures online
- ✓ No paid-in minimum capital requirement
- Creation and improvement of one-stop shops
- ✓ Standardized forms
- No court involvement
- ✓ Fixed registration fee

PAYING TAXES GOOD PRACTICES

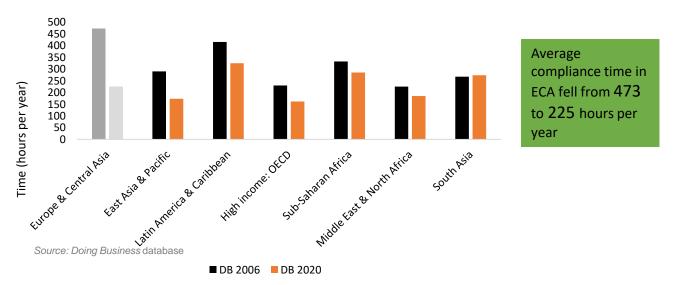

Global good practices

- Offering electronic filing and payment to reduce operational costs and increase tax compliance
- ✓ Adopt a simple one tax base system
- Adopt the principle of selfassessment for tax collection
- Strengthening the tax administration to boost productivity

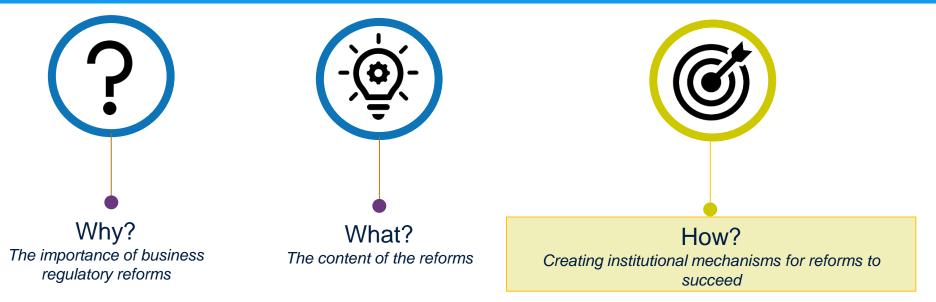

- Since 2004/05, 63 economies introduced online systems for filing & paying taxes
- As of 2018/19, 106 economies have a system of electronic filing & payment of taxes
- This shift cut tax compliance times globally
- In economies with fewer tax payments there is a lower perceived level of public sector corruption

THE INSTITUTIONAL SET-UP FOR REFORMS IS VITAL TO THE SUCCESS OF PROGRAMS

- Focusing on the *how*: regulatory reforms often fail to materialize because of a lack of coordination within government.
- Institutional set-up and coordination are key to (i) successfully identify and prioritize reforms, and (ii) ensure successful reform implementation.
- High level leadership is important, but it is not enough: Accountability and escalation mechanisms are key to assess reform likelihood

Why focus on organizing for reforms?

Key challenges

Coordination issues among Government agencies hamper progress in reform implementation

Lack of effective information sharing among Government agencies and with the private sector

Political economy issues lead to resistance/delays in reform adoption

Poor mechanisms for building support for investment climate reform policies and reforms

Overlapping of functions and mandates

Challenges related to national/subnational coordination

Possible solutions

High-level coordinating agency/body with clout and endorsement at the highest level to direct and supervise investment climate reforms

Key functions/responsibilities for programmatic reform program oversight outlined and filled

Good understanding of the political economy to identify key stakeholders within the institutional landscape

Protocols for inter-agency communication and coordination, for example through MOUs and interministerial councils; incentives for subnational units

Effective consultation mechanisms and feed-back loop mechanisms

Reform strategies – Five common features of successful reformers

Leadership at the highest political level and clear accountability mechanisms

e.g. Prime Minister or President's endorsement in Colombia, Costa Rica, Malaysia, Russian Federation, Macedonia FYR, Turkey

A long-term comprehensive vision and clear objectives

e.g. Malaysia and Mauritius: high-income economy by 2020; Colombia: most competitive economy in region

Inclusive reform with an appropriate institutional mechanism

e.g. public-private National Competitiveness Councils in Colombia and Peru, PEMUDAH in Malaysia, Business Reference Panel & business surveys in the UK

Detailed implementation plan with measurable goals which are monitored

e.g. Peru, Colombia, Mauritius developed action plans that are monitored and regularly updated; Korea and Peru report progress to public; monitoring through performance indicators with escalation mechanism to PM in the UK

Private sector involvement and effective communication

e.g. public private steering committees and working groups in Morocco, Malaysia, Russian Federation, Turkey

How to organize for reform – different models but common characteristics and functions

| Level | Features | Responsibilities |
|--|---|---|
| High-level oversight mechanism | Often public-private Relevant ministries for investment climate reform agenda Direct periodic reporting PM or President (e.g. monthly, every 3 months) | Determine overall priorities Setting KPIs* Unblocking implementation obstacles/delays together with PM / President |
| Coordinating unit | Technical staff Direct reporting line to PM Liaise between technical level working groups and steering committee or PM Escalate key issues to steering committee or PM for action | Day-to-day oversight of reform program across all areas Monitoring of reform road-map and KPIs/ setting KPIs Ensure agenda setting, minutes, follow-up items, timelines Escalating issues |
| Technical working groups *Key performance indicators | Key stakeholders from public agencies (e.g. focal points of relevant line ministries) Private sector; professional experts (lawyers, IT, accountants, architects, etc.) Frequent structured meetings (e.g. bi- monthly) | Develop and implement detailed action plans bringing in expertise where needed (e.g. legal assessments, proposals for legal amendments, IT assessments, budget proposals) Develop timelines and milestones; clarify responsibilities |

HOW CAN ASEAN SUPPORT THE IMPROVEMENT OF THE BUSINESS ENVIRONMENT?

- Country to country learning events within ASEAN. For example, Thailand and Malaysia have valuable experience to share.
- Regional harmonization of legislation. Example of OHADA Organization for the Harmonization of Business Law in Africa – 17 West and Central African States, has driven many reforms in member countries.
